

RAW MATERIAL OPTIONS

Premium Material Options for DIAFEX Diaphragms

DIAFEX offers two premium raw material options for hydraulic breaker replacement diaphragms. Both options are processed within our controlled in-house manufacturing system, allowing customers to select the material option that best suits their requirements.

OPTION 01 · JAPAN

Japanese Raw Material – 1st Quality

A premium Japanese raw material option used in DIAFEX diaphragm production, combined with our dedicated moulds and controlled manufacturing processes.

OPTION 02 · GERMANY

German Raw Material – 1st +Quality

Our premium German raw material option for customers requesting the 1st +Quality material level, manufactured using the same DIAFEX in-house production and dedicated mould-making capabilities.

01

Premium Material Selection

Two clearly defined raw material options from Japan and Germany.

02

In-House Manufacturing

Production processes are managed within DIAFEX facilities in Istanbul, Türkiye.

03

Dedicated Moulds

Diaphragms are produced using DIAFEX dedicated moulds made in our own mould-making facilities.

Material selection support: Customers can contact DIAFEX to discuss the appropriate raw material option for their application and purchasing requirements.
